

ELGIN BASED FIRM EXPAND

A C Yule currently involved in providing glass, aluminium and PVCu for buildings have recently expanded their Elgin operation by adding 50% more production floor space.

Commenting on the expansion, Business Unit Manager, John Archibald, stated "For some time we have been operating in a restricted production space. The advent of the additional production space has allowed us to invest in new machinery to assist with our production output. This allows us to increase our production as well as improve the efficiency of the operation."

The additional floor space will result in the creation of approximately 4-5 new jobs for the Elgin area. A C Yule's Elgin operation currently employ 40 staff and operate throughout the north of Scotland and down the west coast of Scotland.
